

## Quantity Surveyor

---

**Discipline:** Cost Engineering  
**Location:** Bergamo, IT  
**Job ID:** JOB03 – Quantity Surveyor

### 1. Overview of work

Studio Iorio is an independent firm of designers, engineers, consultants and technical specialists offering a broad band of professional services. Studio Iorio has designed the structures of some of the most challenging and innovative national and international projects. We offer our services individually or as part of a multi-disciplinary team, on projects ranging from new construction to renovation of historic buildings. Among the most recent projects, we designed the structures of Isozaki Tower within the neighborhood of Ex Fiera Milano and the auditorium “Parco della Musica” of L’Aquila, designed by Arch. Renzo Piano.

If your application is successful, you will be working with the project team to support the project leaders with the drafting of BOQ using specific software (Excel, STR Vision, Primus). You will have the opportunity to work on a variety of challenging projects in a multidisciplinary context. Our ideal candidate will be resourceful and a good team player. He must have a good knowledge in the field of structural design.

Minimum 3 years experience in a similar role within a construction company, an engineering firm or a consulting company, is required.

### 2. Job description

The ideal candidate will have the opportunity to participate on a variety of projects and will produce high level work. His main responsibilities will be:

- refer to a design engineer or project manager;
- work together with our project managers to provide expert support to the design;
- calculate quantities and costs of design with different materials such as concrete, steel and timber;
- use of software application for estimating and spreadsheet of own production;
- analyze CAD drawings, representations and other documentation related using 2D and 3D software.

### 3. Job requirements

- master’s degree in Structural Engineering, Civil Engineering or Architecture;
- excellent technical skills and a professional approach;
- good knowledge of software for technical drawing (AutoCAD 2D and 3D, Revit 2013/2014);
- excellent use of Microsoft Office Suite (Word, Excel, Access);
- excellent use of BOQ and cost estimation software (STR Vision, Primus);
- good knowledge of for high-performance project management software (Primavera P6, MS Project);
- strong communication skills at all levels;
- demonstrated ability to work in a team oriented environment;
- ability to work under pressure and meet strict deadlines;
- highly motivated and willing to learn and meet new challenges;
- flexibility in an environment with frequent changes in deadlines.
